.NET Developer with five years of experience developing web, batch, and business process applications using ASP.NET, MVC, C#, .NET Core, SharePoint, and SQL Server. Expertise in requirements analysis, design, development, testing, maintenance, enhancement, and production support of business applications. Self-learning Web Development Professional with a deep passion for technology, extensive technological expertise, and well-developed teamwork abilities.

Professional Summary

- Highly motivated team player with good communication and solving skills and the ability to learn new tools and technologies rapidly.
- Working knowledge of agile methodology, SOLID, and DRY coding principles.
- Assisting with day-to-day project support with the business analysts and clients.
- Tailored the large-scale applications based on n-tier architecture and implemented using design patterns like Strategy and Abstract Factory patterns.
- Designing the schema and creating the databases and stored procedures using SQL Server.
- Developed reusable and optimized .NET components and libraries.
- Experience in web development using HTML5, CSS3, JavaScript, jQuery, and ReactJS.
- Experience in utilizing open-source JavaScript libraries (ChartsJS, High Charts) for designing live dashboards and reports.
- Experience developing, integrating, and deploying web services using Web API.
- Managed call flow and responded to technical support needs of clients.
- Proficient with Microsoft Visual .Net, C#, and/or Development Skills
- Implemented and created governance plans, project management guidelines, deployment, and development methodologies to reduce error, increase implementation times and quicken SharePoint development.
- Developed the tabs, collapsible panels, and accordion panes in SharePoint pages.
- Working knowledge of creating SPFx web parts using ReactJS and Typescript.
- Have good hands-on experience in manipulating Excel data using COM Interop and VBA.
- Meeting with end-users and stakeholders to gather requirements, and create functional and technical documents using Jira/Confluence.
- Involved in daily and weekly meetings with Clients.
- Participated in the documentation of detailed level technical and functional specifications, and mentor junior engineers.

Skills

ASPNET, MVC, C#	<div><div></div></div>	Very Good
.NET Core	<div><div></div></div>	Good
Web API/Rest API	<div><div></div></div>	Good
SQL SERVER	<div><div></div></div>	Very Good
TFS/GIT/Bit Bucket	<div><div></div></div>	Very Good
SharePoint/ SPFx	<div><div></div></div>	Good
PowerApps/Power Automate	<div><div></div></div>	Good
Azure	<div><div></div></div>	Good
JavaScript/jQuery	<div><div></div></div>	Good
HTML/XML/CSS	<div><div></div></div>	Very Good

Work History

2019-05 -
2020-08

Software Engineer – Application Services

Znalytics Business Solutions (Tally Group), Hyderabad, Telangana, India

- Handling Projects/Change requests (Gathering requirements, analyzing the impact, designing, developing, and testing the End-to-End Solution).
- Working knowledge of multifactor authentication using OAuth.
- Working knowledge of using NPM package manager for generating the template for React web parts, and PNP web parts.
- Implementing the test cases using Unit testing and Dependency Injection.
